PROPOGATORS AND GROWERS OF TRUE TO NAME
NURSERY STOCK

—CATALOGUE AND PRICE-LIST—

1915

The Tingle Printing Co., Pittsville, Md.

1915

GREETING

1915

TO our friends and customers. We thank you for the double patronage which you gave us in 1914, and for the large number of new customers, who gave us their orders by you recommending us to them in the way of showing them your trees and plants, which you purchased of us.

We extend to all our most hearty greetings and wish you a prosperous New Year. We take great pleasure and are thankful to again have the chance to present to you our 1915 Catalog which illustrates and describes the plain truth about the money-making varieties of trees and plants.

For 1915 we have the largest stock and as good as we ever produced which principally consists of thousands upon thousands of fruit trees; a large stock of California Privet Hedge and Asparagus roots in connection with eight million (8,000,000) Strawberry plants of the leading varieties, both old and new. We do not make any attempt to mislead our customers by saying our stock is better than that grown by any other nurseryman and will produce the greatest results, but we do say that we use every effort to keep all of our trees and plants clean, thrifty, free from disease and insects and true-to-name; we positively will not send you any stock we would not plant ourselves, we do not cultivate as many acres of land to the growth of nursery stock as some other nurserymen, but give to all of the work our personal attention, and are sure you will agree that this enables us to keep the many varieties of trees and plants true-to-name; while real large growers of nursery stock must necessarily leave a large part of this important work to their hired men who are not always interested in the work at HEART.

We are pleased at any time to take any of our friends and customers through our nurseries and show them the stock we have to offer.

Again we thank you for the double increase in the business which you gave us in 1914.

To you all, we wish a prosperous New Year.

Yours respectfully,

G. E. BUNTING & SONS.

Read Carefully Before Ordering

Orders. Orders should be sent in just as soon as possible—it is better for you as well as the nurseryman.

Time of Shipment. From the time you receive this Catalog until May 15th. Our heaviest shipments are in March and April.

Guarantee. We guarantee all stock to reach customers in good condition when ordered by Mail or Express, and taken from the office on arrival and opened at once. All orders by freight at owners risk.

Packing. We make no extra charge: all stock is delivered f. o. b. train at prices quoted in this catalog.

True-to-Name. While we exercise the greatest care to have every tree or plant true-to-name, and are ready, on proper proof, to replace any stock shipped by us that proves to be otherwise, free of charge, it is understood and agreed that we will not be held responsible for any sum greater than the cost of stock which may prove untrue.

Terms. Cash with order or satisfactory reference. Remit by Registered Letter, Money Order, or Draft; Postage stamps for orders less than one dollar.

Reference. Baltimore Trust Co., Selbyville, Del; Selbyville Manufacturing Co., Selbyville, Del.

Parcels Post. Trees that measure 2 to 3 feet can be shipped by Parcels Post. When trees are to go by Parcels Post add at the rate of 3 cents per tree extra; When Strawberry plants are to go by Parcels Post add at the rate of 25 cents per 100 plants, extra for postage.

Special Prices. We quote very attractive prices on large orders. Write and tell us your wants.

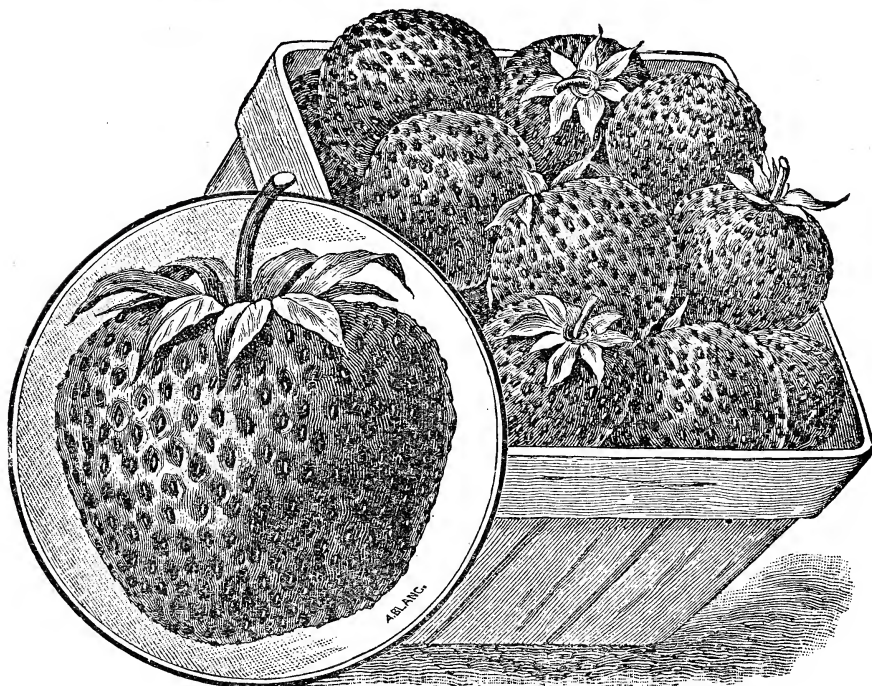

When Ordering. Be sure to sign your name and address plain, also give Post Office, County and State in which you live. If your Post Office address is different from the Railroad station, be sure to give both.

Claims. If any, must be made within five days from receipt of goods. We cannot become responsible for misfortune of stock caused by droughts, floods, frosts, insects, etc. These things are entirely beyond our control.

Application of Prices. The prices in this catalog (except where noted) apply as follows: 1 to 4 trees are sold at the each rate; 5 to 49 are sold at the 10 rate; 50 to 299 are sold at the 100 rate; 300 or more are sold at the 1000 rate.

For Rush Orders. We have the Long Distance Telephone No. 1—11; and the Western Union Telegraph.

Strawberry Plants

KLONDYKE

KLONDYKE—(Perfect). Medium early. A very popular variety with growers everywhere, it has for the early market berry been extensively planted here at Selbyville for the past seven years and is now being altogether planted; it is noted here for its firmness which enables it to be shipped at a distance of several hundred miles and then can be placed on the market in first-class condition; the fruit is of large size highly flavored; a strong plant maker.

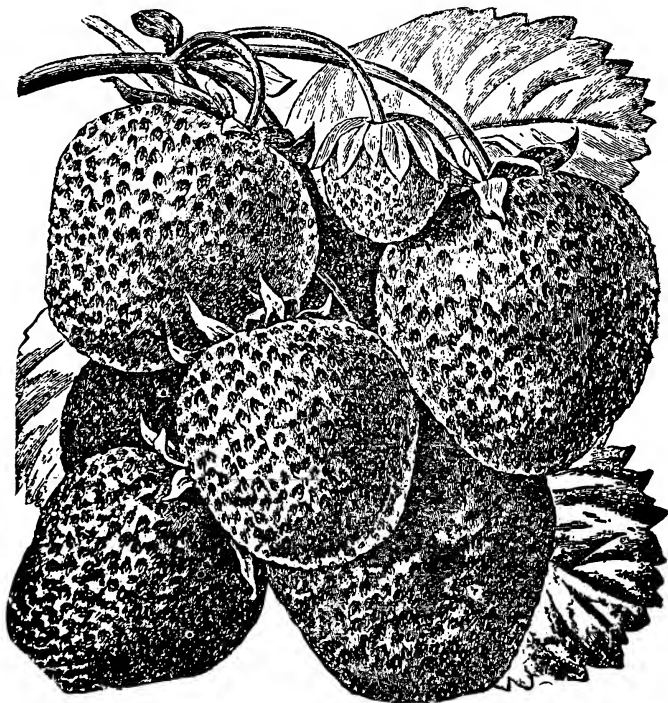

MISSIONARY—(Perfect). Early. The Missionary is probably the most popular early Strawberry grown in the South at this time, and is here giving satisfactory results wherever planted. The berry is large in size and is noted for holding its ripening season, which is long.

EARLY OZARK—(Perfect). Extra early. This berry is fast taking the lead for an early berry; has very large blossoms full of pollen; early as Excelsior; larger than the Klondyke; more productive; has produced fifteen berries that made a rounding quart. We unhesitatingly recommend this variety of Strawberries to any grower.

EXCELSIOR—(Perfect). Extra early. A standard old variety, well known all over the country, and is just as good today as it ever was, one of the first to ripen, size medium to large, very productive and firm.

EWELL'S EARLY—(Perfect). Strong grower, about the same size as Excelsior but more productive, if given a fair chance it will take care of itself and bring good results. Very productive, extra early.

RED BIRD—(Imperfect). Early. This variety originated in the state of Mississippi; has been thoroughly tested: very productive of big red berries; a good plant maker. It is a pistillate and should be planted near some perfect flowering variety for best results.

CLIMAX

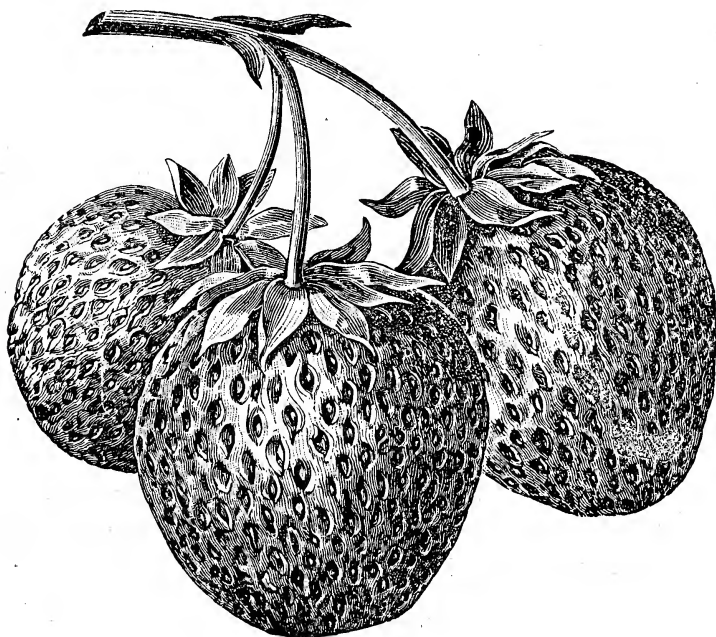

CLIMAX—(Perfect). Early. This variety has been extensively planted and is giving the best of results, it is a heavy yielder of very large berries, well shaped, solid, red in color to the center.

BETHEL—(Perfect). Mid-season to late. Originated in Kent county, Delaware. We have watched this variety fruit for the past two seasons, and are well pleased with the results. The fruit is extra large, firm, color red to the center, a heavy cropper covering a long season, strong grower, free from rust.

SUPERIOR—(Perfect). Early. Very productive; berries large and firm, with many of them; one of the greatest plant makers; noted for its productiveness and good shipping qualities.

FAIRFIELD—(Perfect). Extra early. Larger than the Excelsior in size and has far better eating qualities; it is the very best early berry we grow for home consumption and local markets.

MICHAEL'S EARLY—(Perfect). Extra early. This variety is well known and popular; has been and is now extensively grown all over the country; fruit ordinary size; firm and productive.

SENATOR DUNLAP

LADY THOMPSON—(Perfect). Medium early. A great Southern variety and has been tested all over the country; fruit large, pink in color; solid and meaty; plants deep rooters, very good in dry localities; an old standard variety the country over.

SENATOR DUNLAP—(Perfect). Very early mid-season. Heavy yielder of big red berries that are firm and attractive; sells for top prices; abundant bearer and a good shipper. This variety is extensively planted all over the eastern half of the country. A reliable market berry.

✓ **EARLY RAMBLER**—(Perfect). Extra early. Produces immense crops of big red berries of a fine flavor; one of the earliest varieties we propagate; ordinary firm and a good shipper.

EARLY QUEEN—(Perfect). Early to mid-season. An excellent variety in every respect; foliage very strong and free from rust; fruit extra large of banana flavor. Very popular.

EARLY HATHWAY—(Perfect). Extra early. A standard for earliness; the fruit is large in size; very productive and firm; one of the best shipping berries grown; has been extensively grown here at Selbyville for market purposes. We can recommend this berry to any grower.

BUBACH—(Imperfect). Midseason. This is an old and reliable variety, well known the country over; fruit extra large; bright red with a tendency to show a waxy surface; foliage very strong; color a dark green; one of the very best mid-season varieties.

BARKLEY—(Perfect). Early mid-season. A deep rooter; extra large crimson foliage; produces very large crops of big red berries; long fruiting season.

RYCKMAN—(Perfect). Mid-season. Produces an abundance of very large and vigorous plants, and tremendous crops of very large berries; is noted for producing great crops on very poor soils. Is now being extensively grown in the New England and Middle Atlantic states. One of the best mid-season sorts.

HELEN DAVIS—(Perfect). Early to late. Noted for its productiveness and very long fruiting season; yield enormous crops of very large berries, many of them average near as large as medium sized hen eggs; fruit firm; foliage tall and green; a good plant maker.

GLEN MARY—(Imperfect). Mid-season. An old standard variety, and a veritable giant in both fruit and foliage; the big dark red berries with prominent seeds of bright yellow lie in piles around the plants, certainly forms a tempting and attractive appearance. Fruit firm; a reliable market berry.

PARKER'S EARLE—(Perfect). Mid-season. Strong grower of very large plants; fruit ordinary large and firm; excellent flavor and good shipper.

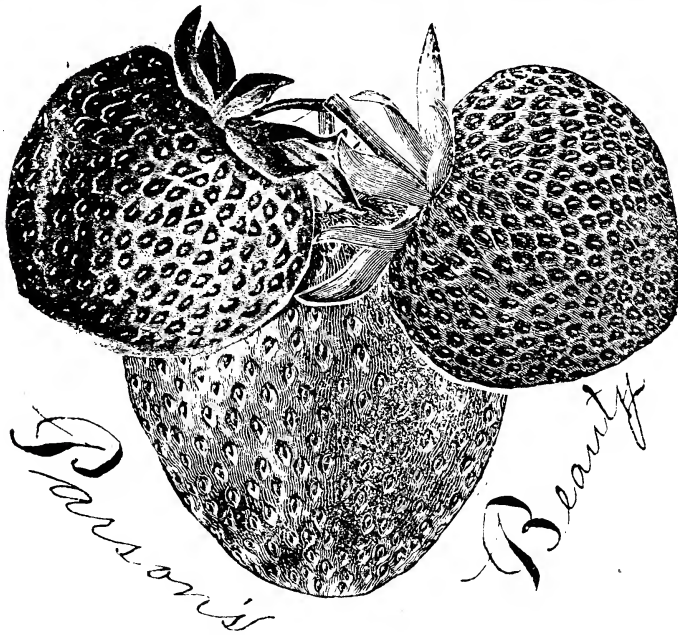

PINEAPPLE—(Perfect). Midseason. Fruit large of decided Pineapple flavor; a strong plant maker, good cropper and one of the best market berries.

TENNESSEE PROLIFIC—(Perfect). Mid-season. Well known old standard variety; is extensively planted; one of the very best market sorts; like the Parsons' Beauty succeeds over a great variety of soils; very productive of bright red fruit. This variety is a strong pollenizer and is a good one to plant with some imperfect variety such as Haverland, Glen Mary, etc.

HAVERLAND—(Imperfect). Mid-season. An old standard variety well known the country over, and has been tested for a generation and is just as good today as it ever was. Plants strong growers; berries very firm, large and conical.

EKEY O. I. C.—(Perfect). Mid-season. Quality unsurpassed; plants large strong and healthy; no sign of rust or disease of any kind; the fruit is extra large and conical; holds its size well until the end of the season; very productive.

STEVENS' LATE CHAMPION—(Perfect). Late. This variety is strictly a favorite with all Northern growers; fruit large to extra large; flavor mild; ordinary firm; very productive in both fruit and foliage.

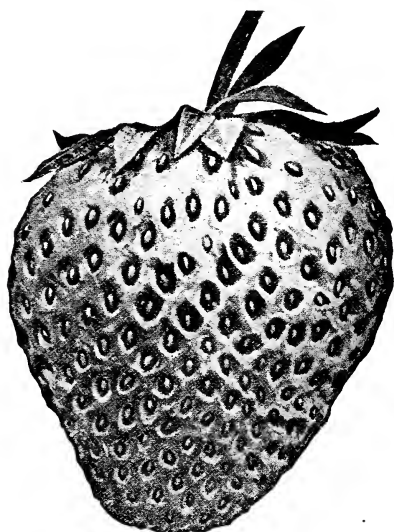

PARSONS' BEAUTY—(Perfect). Mid-season. This variety has been and is now largely planted all over the United States; it will grow and produce fruit on any soil that will produce Strawberries of any kind; it makes an extra heavy yield of big red berries; one of the very best for canning purposes. We have over two million plants of this single variety to offer this spring and can quote very attractive prices on large orders. The stock is all of our own product.

MYERS' NO. 1—(Perfect). The berries ripen about three days before Gandy. It will bear extra large crops, let the weather be wet or dry. Succeeds on all soils; fruit ordinary size and firm, a general favorite for long distance shipping. Originated in Sussex county, Delaware.

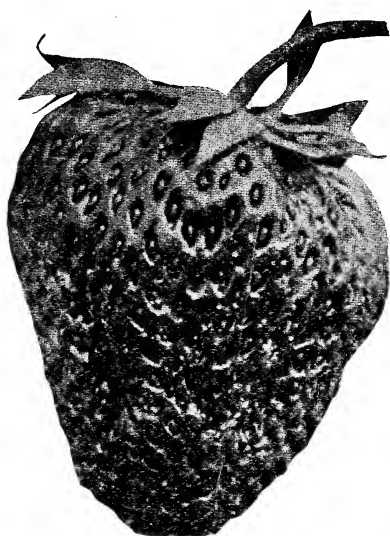

BRANDYWINE—(Perfect). Late. A standard old variety the country over. We ship several thousand Brandywine plants to California every year, where it seems to be a leader. Fruit extra large and firm; has unexcelled shipping qualities and a very good one for canning purposes.

GANDY—(Imperfect). Late. Largely grown here at Selbyville for the late market variety. It is exceedingly popular with growers everywhere, the country over. Should never be planted on dry sandy land. We have over two million plants of this variety alone, and can quote attractive prices on large orders.

NICK OHMER—(Perfect). Late. An old standard late variety that has been tested the country over. Fruit is firm, large in size, rich in flavor, unsurpassed as a long distance shipper; plants very strong and free from disease. An extra good plant maker.

CHESAPEAKE

SAMPLE

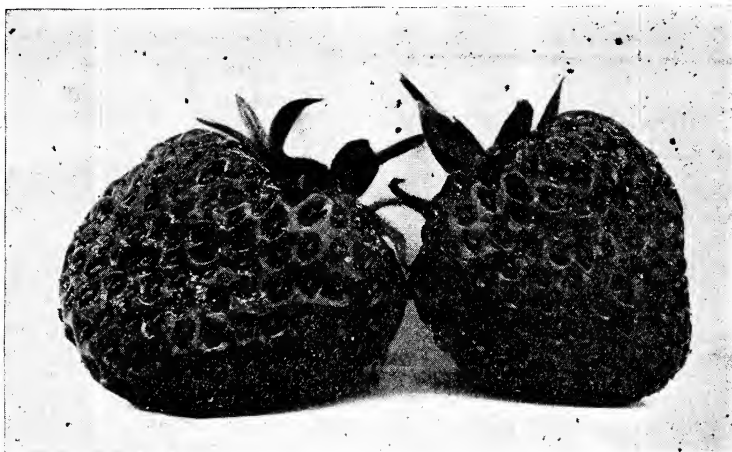

CHESAPEAKE—(Perfect). Late. One of the largest and most productive late varieties that we grow; fruit very firm, extra large and roundish; plants are the healthiest that we ever saw, dark green in color, rich and vigorous no rust, no disease, in fact no weakness of any kind. Anyone who grows this variety will detect more favorable points about this berry than is given in this description. Introduced by neighbor, W. F. Allen of Salisbury, Maryland in 1906. We have 300,000 plants of this variety for this spring delivery.

SAMPLE—(Imperfect). Late. One of the most attractive of all medium to late varieties, producing not only large berries but immense quantities of them as well; this extremely large berry is bright red, the inner part being a deep scarlet. The Northern states seem to be its home.

NEW YORK—(Perfect). Mid-season. This is a very popular mid-season variety; resembling the Chipman's Seedling; very large and productive; plants strong and well rooted; foliage very strong.

PRIDE OF DELAWARE—(Perfect). Late. We are the originators and introducers of this great late variety of Strawberries which is rapidly pushing its way to the front. Fruit large and roundish, rarely misshaped, extra heavy bearer; one of the deepest rooters that we ever saw, very popular in dry localities; foliage tall and upright, has a dark green leaf.

WM. BELT—(Perfect). Mid-season. Considered by many to be the best grown in the United states. The plant is vigorous and succeeds upon a great variety of soils, and invariably yields very heavily. It begins to ripen quite early and continues almost to the close of the season. It is firm and a good shipper and gives large pickings for a longer period than most varieties.

REWASTICO

REWASTICO—(Perfect). This valuable new berry was introduced by W. F. Allen, who considers it the only real competitor the Chesapeake has. Fruit is large, solid, colors well and has a very good flavor; foliage very strong. We unhesitatingly recommend this valuable new Strawberry to any grower who has a strong desire for fancy fruit.

JOE JOHNSON—(Perfect). As large as the Chesapeake and ripens a few days earlier, colors all over, no green tips, has a good strong flavor, will thrive on a large number of soils, which is a credit to any variety of Strawberries, one of the very best late varieties. Any one who grows the Joe Johnson Strawberries will detect more favorable points about this great Strawberry than is given here.

THREE W'S—(Perfect). Mid-season. Noted for its extra long keeping qualities. Originated in Tennessee; plants are very large and vigorous; with a wonderful root system; something very fine for dry localities; fruit is of large size, good color and an extra strong flavor.

✓ **CHIPMAN'S SEEDLING**—(Perfect). Mid-season. Fruit very large of bright red color; solid and a good shipper. Plants very strong and extra long rooted; this variety is not liable to be attacked by the Strawberry beetle, it has proved this by being planted in some sections where the beetle has done considerable damage to some other varieties but the Chipman was not seriously damaged.

UNCLE JIM—(Perfect). Mid-season. Fruit extremely large of a decided Banana flavor; one of the largest and greatest mid-season varieties grown; has proven satisfactory in nearly every state in the union and on most every kind of soil except light sand.

OSWEGO—(Perfect). Mid-season. Large, firm and productive and a reliable market berry; excellent.

NORWOOD—(Perfect). Mid-season. This is the famous variety that produced four berries to the quart in the state of Massachusetts; one of the very largest Strawberries grown. Fruit bright red and of good quality; plants extra large and strong growers.

MARSHALL—(Perfect). Midseason. A moderate plant maker; of choice strong, well-rooted plants; fruit large to very large; colored through and through; flavor as fine as one could wish; very attractive, a standard medium variety.

CORSICAN—(Perfect). Mid-season. Very large and productive of a rich melting flavor; plants strong and well rooted; foliage very healthy of light green color; extensively grown in the Northern states.

FENDALL—(Imperfect). Originated in Maryland by Chas. E. Fendall. The fruit is large of a high flavor, the berries are bright red with extra large cap which draws immediate attention; fruit firm, good shipper.

JESSIE—(Perfect). Mid-season. An old standard variety; fruit firm and solid, of excellent quality with but a few small berries and none of the largest ones of irregular shape. The plant is one of the healthiest that we are growing this season. Fruit extra large and firm, very productive.

WILSON—(Perfect). Mid-season. Probably the oldest Strawberry in America, and is today not surpassed by any other variety for productiveness; the fruit is very large and firm; one of the very best for market purposes; a great plant maker which are very strong and will succeed on any variety of soil. We do not know of but one Nursery in the United States except ours that can furnish the real old Wilson variety of Strawberry plants. We only have about 40,000 plants of this variety and it will be well for you to get your order for Wilson to us early, before they are all sold out.

PRIDE OF MICHIGAN—(Perfect). Mid-season. Produces immense crops of very large berries on almost any soil, and in any climate that will produce corn.

AROMA—(Perfect). Late. Popular wherever grown; not quite as late as the Gandy but will continue in bearing nearly as long; bears an immense crop of very fine fruit that will stand shipping to long distance markets. This variety is largely planted by the large growers and associations and Nurserymen do not always grow enough plants to supply the demand.

DUNCAN—(Imperfect). Ripens between the Parsons' Beauty and Gandy varieties resembling the Gandy very much in both fruit and foliage. The berries are large and will stand long distance shipping.

MASCOT—(Perfect). Late. This variety begins to ripen about two or three days after the Gandy first start. We have fruited it for the past seven seasons, and can say that it is one of the largest that we grow; very productive, unsurpassed as a long distance shipper. The demand for Mascot with us last season increased to about 100,000 plants more than the year before, and we were pleased to notice that most of the heavy buyers were the ones that bought plants the year before. They are extensively planted in Pennsylvania and West Virginia. For illustration of this berry see first cover page.

FALL-BEARING STRAWBERRIES A SUCCESS

Strawberries all summer can be obtained by planting the Fall-Bearing Strawberry plants, you must keep all blossoms and stems removed as fast as they grow until the middle of July. After this date let the plants bloom and in two or three weeks you can pick ripe Strawberries and the plants will continue bearing until freezing weather. We have a large stock of plants this season and guarantee them to be first class and true-to-name, and are quoting the price low enough for one to purchase and plant a few hundred for home use.

SUPERB—(Perfect). One of the best of the Fall-Bearing Strawberries. Fruit large, glossy and very attractive of the finest flavor. The plants are strong and healthy, making a good number of new plants.

✓ **PAN-AMERICAN**—(Perfect). Will yield in Fall months bumper crops of Strawberries. It is just as persistent in bearing a crop of Strawberries in the Fall as any other variety in the Spring. Blooms and ripens until cold weather.

AUTUMN—(Imperfect). This is another grand Fall-Bearing Strawberry if grown in the hill system. It has averaged over a pint of berries to each plant. Berries not quite as large as the Crescents.

PRODUCTIVE—(Imperfect). A seedling of Pan-American and Autumn. Berries medium to large in size, with prominent seeds on the outside. A good plant maker. This is considered by Mr. Cooper, the originator, the most popular Fall Strawberry.

✓ **TEDDY ROOSEVELT**—(Imperfect). Fruit large and solid; highly flavored. A good plant maker. For best results should be planted in the hill system. It will not bear much fruit if you allow it to make many new plants.

We will sell 50 at the 100 rate; 300 or more at the 1000 rate.

All plants are fresh dug from one-year-old rows propagated and grown with the best of care, especially for the sale of plants.

The Sex and Mating of Strawberry Plants

In this book of Strawberry plant descriptions, the mark (Perfect) indicates a staminate or bi-sexual variety; (Imperfect) indicates a female variety. The staminate or bi-sexual is called bi-sexual, two sexes, or perfect flowering because it will produce immense quantities of fruit when set entirely by itself. In fertilizing the pistillate it is spoken of as "male" although it is not distinctly a male in sense that the pistillate is distinctly and only a female. Remember that the perfect flowering variety when set alone will produce a full crop of fruit; on the other hand pistillate or imperfect varieties ought to be mated or they will not produce a full crop of fruit. Hoping the facts just mentioned will be perfectly understood and to illustrate our meaning, we suggest that an ideal setting would be six rows of Parsons' Beauty, six rows of Haverland and so on; the same with any of the other perfect and imperfect varieties that you may choose.

How to Set Strawberry Plants

A Properly Pruned Plant

This illustration shows one of our plants with roots and crowns both pruned

The Strawberry will thrive in a great variety of soils and locations; almost any land that will grow good crops of corn or general farm crops will produce Strawberries.

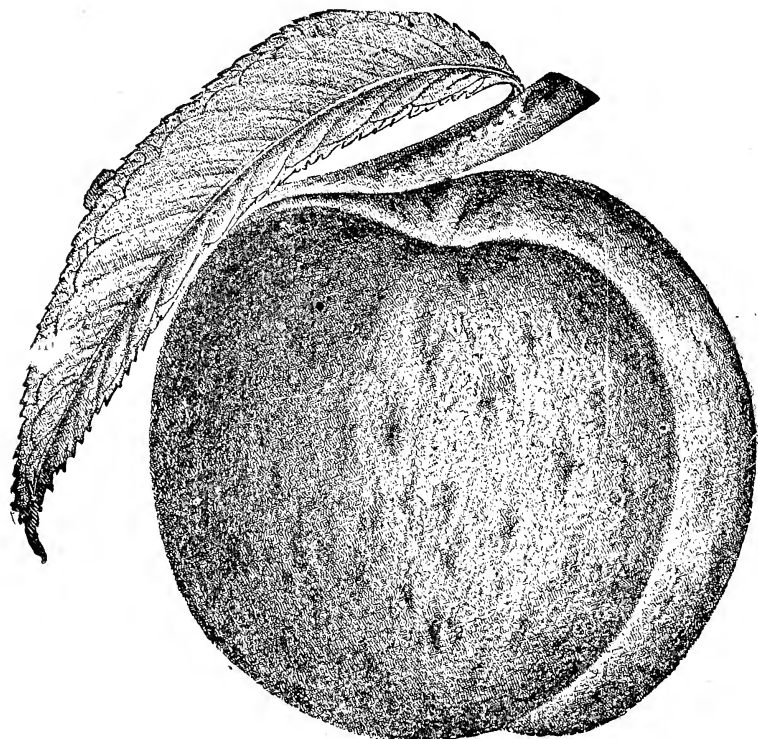

The land should be plowed very deep, if possible, as this gives the water a chance to go down and causes moisture to rise in time of droughts; lay off the rows after you have thoroughly pulverized or made smooth by the use of some machinery, either 3 1-2 or 4 feet apart, set the plants from 12 to 18 inches apart in the row. It requires 8,297 plants to set an acre of land when the rows are 3 1-2 feet apart with plants set 18 inches apart in the row; this is a very good way to plant them. Give them clean cultivation, after planting keep all weeds and grass free from the rows; do not use chemical fertilizer heavy at the roots, you are liable to cause them to die by doing so. If possible the land where you are to set plants should be spread with old barn yard manure before it is plowed; there is no danger in using too much barn yard manure.

Pruning Roots

Before setting plants, it is best to prune the roots back about one-third. Cutting off the ends of the roots causes them to callous, and they will send out numerous feeders and will make a much stronger root system than could be made if the roots were not pruned. And shortening the roots makes it easier to set the plants. In doing this pruning you simply take a pair of shears or a sharp knife and cut about two inches off the lower end of the roots. A full bunch of twenty-five plants may be pruned at one cutting.

Select List of Peach Trees

CARMAN

We have a large stock of the following list of Peach trees, budded from our own bearing orchards, and can promptly fill orders large or small. We guarantee the stock to be strictly first class and true-to-name; well graded and to the size represented, and are offering them at a price that will suit the buyer.

PRICE OF PEACH TREES

	Each	10	100	1000
First-class, 5 to 6 feet,.....	\$.20	\$1.50	\$8.00	\$70.00
First-class, 4 to 5 feet,.....	.15	1.00	7.00	60.00

We will furnish 300 trees or more at the 1000 rate. Write for special prices on orders for more than 1000.

Elberta. Mid-season. A valuable large Peach of good quality; fruit is large, yellow with red cheek; juicy and extremely high flavored; flesh yellow; freestone. The leading market variety. Ripens here about the middle of August.

Carman. A very hardy Peach, ripens here about the middle of July; skin pale yellow; with blush on sunny side; flesh white, tender, sweet and melting. Ships well. The leading early market Peach.

Chair's Choice. Begins to ripen here about the first of September. Large in size; flesh firm of the sweetest and richest grape flavor; color yellow. Freestone.

Lemon Free. Ripens in September. Color when ripe same as a lemon in both flesh and skin; size very large; one of the very best for market and canning purposes; keeps well for a long time after being picked. A perfect freestone.

Belle of Georgia. Ripens here the first to the fifteenth of August. Fruit large, white with red cheek. Flesh white, firm of excellent flavor. Tree a rapid grower and very productive. One of the very best market sorts. Freestone.

Hiley. This is a seedling of Belle of Georgia and is one of the best Chinese type, which are our most hardy Peaches today; ripens about one week before Belle of Georgia. A large creamy white Peach with rich blush on sunny side; a long keeper and a fine shipper. A perfect freestone.

White Heath Cling. Ripens from September 10th to 25th. This is an old variety of cling Peach and has never been excelled by any other of its class. Fruit extra large and roundish; flesh white and exceedingly juicy. It is a favorite with all housewives for canning purposes.

Greensboro. Ripens here from June 25th to July 10th. Extra large; our earliest Peach to ripen. Large in size; white in color with a red cheek. Flesh rich and melting; very juicy; tree a strong grower. Anyone who has a yard or garden should set a few trees of this wonderful Peach.

Saratoga. A fine late, large, yellow clingstone. If you want a yellow clingstone for canning or other purposes, this is the one.

Certificate of Nursery Inspection

Dover, Delaware, September 15, 1914.

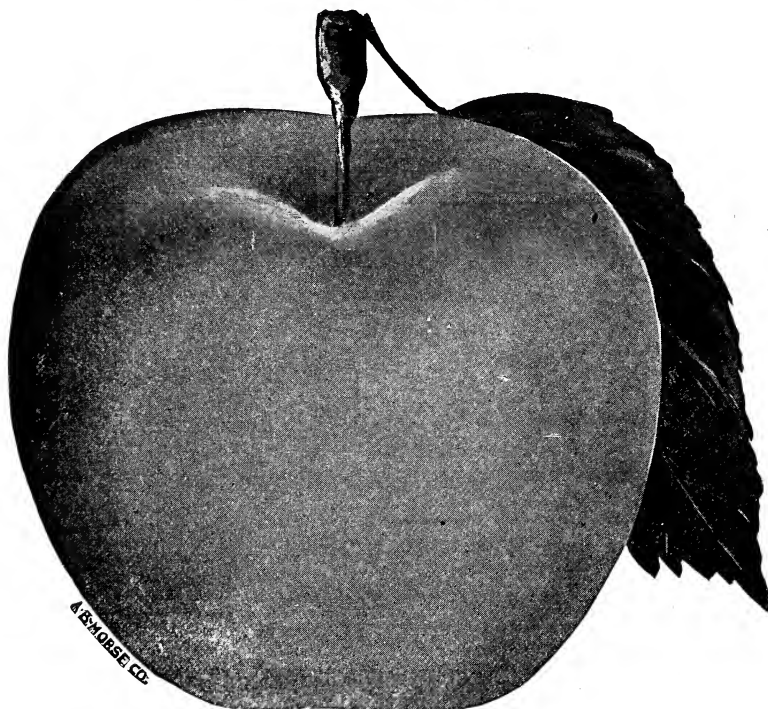

To Whom It May Concern:

This certifies that I have this day examined the nursery stock and premises of the Nurseries of G. E. Bunting & Sons, Selbyville, Sussex county, Delaware, and that said nursery stock is apparently free from crown gall, peach yellows, peach rosette, the San Jose scale, and all other plant diseases and insects of a seriously dangerous nature, and that may be transferred on nursery stock.

This certificate may be revoked by the State Board of Agriculture for cause and it is invalid after August 31, 1915, and does not include nursery stock not grown on the above named premises unless such stock is covered by certificate of a State or Government officer and accepted by the State Board of Agriculture.

WESLEY WEBB, Inspector.

Select List of Apple Trees

YELLOW TRANSPARENT

Never has the Apple grower been surer of profits than at the present time. Today, spraying and proper care of orchards, with modern methods of packing and marketing have revolutionized the whole industry. Our stock of Apple trees for the present year is large; thoroughly sound, free from disease and comprises the most approved varieties in cultivation. We present only a general list of the best varieties, all of our own growth. All stock is straight, smooth rooted and will be sold at reasonable prices.

PRICE OF APPLE TREES

	Each	10	100	1000
First-class, 4 to 6 feet, two year	\$0.15	\$1.25	\$10.00	\$95.00
First-class, 3 to 4 feet, one year10	1.00	8.00	75.00
First-class, 2 to 3 feet, one year08	.70	6.00	50.00

Gano or **Black Ben Davis**. Uniform in size; keeps until March; rapid grower, fruit very large and handsome. Flesh pale yellow, mild sub-acid. November to March.

Northwestern Greening. A hardy winter Apple, the size is large; color green, which turns yellow at full maturity. Flesh yellowish, fine grained, tender and juicy.

Stayman's Winesap. Fruit medium large; skin green and yellow almost hidden by dark red stripes. Flesh yellow, firm; quality unexcelled. November to April. The best here with us.

Grimes' Golden. Large size. Skin golden yellow, sprinkled with gray dots. Flesh tender, crisp and juicy. One of the very best. September to January.

Manmoth Black Twig. One of the very best winter Apples that we propagate. Extra large in size; skin smooth, yellowish, covered with deep red. Flesh tender, tinged with yellow, crisp, sub-acid, aromatic, of excellent quality in every respect, and will keep in fine condition until summer Apples come.

G. G. Pippin. Large and bright yellow when fully ripe. Flesh tender and aromatic. Season September to January.

Ben Davis. Succeeds wherever Apples are grown. Good keeper. Large, round, yellow with red stripes. Flesh white, juicy, sub-acid. Season November to March.

York Imperial (Johnson's Fine Winter). Medium, white, shaded with crimson in the sun, juicy, crisp, mild, sub-acid. Tree moderately vigorous and productive. This is a large and beautiful red winter Apple, originating in Pennsylvania, where it is a great success. Its foliage and fruit are free from scab. Its skin is bright yellow covered with bright red and striped; it is a good shipper, bringing the highest prices. Its bright red sells the fruit. This is the leading variety in Pennsylvania. Very hardy and suitable to any part of the country.

Jonathan. Medium, roundish, yellow, nearly covered with red, fine grained, tender and finely flavored. Tree slender and spreading with light colored shoots. Great Apple of the West and Northwestern states. Succeeds in East also. Most beautiful of Apples. Season November to April.

Rome Beauty. This is a hardy, large and handsome Apple, almost entirely covered with bright red, of highest quality. December to March. One of the very best.

Winesap. Large, roundish, oblong; little yellow ground appearing on the shady side; flesh yellow, firm, crisp, with rich high flavor; quality very good, and highly esteemed wherever grown. Season November to May.

Baldwin. Large, roundish, skin deep red; flesh juicy, crisp, sub-acid, good flavor; very vigorous and productive. The best all-round winter Apple for New England and Northern states. Keeps splendid. December to March.

Wealthy. An American that is becoming very popular on account of its handsome appearance and early fruiting. Hardy and productive. Fruit large size, roundish, skin smooth, splashed with dark red; flesh white, tender, juicy, sub-acid. November to January

Yellow Transparent. If you want the best and the most productive Summer Apple, plant Yellow Transparent. It succeeds well North and West. It will bear fruit in the nursery row on trees two years old. It's a strong upright grower and a great bearer.

Red Astrachan. Large, roundish, nearly covered with deep crimson, over-spread with a thick bloom, juicy rich, acid, beautiful. The tree is a vigorous grower, with a large foliage; a good bearer. August.

Red June. Medium is size, red. Flesh white, tender, sub-acid, beautiful. The tree is a vigorous grower, with large foliage. Abundant bearer. July.

Winter Banana. Size large, golden yellow, and beautifully shaded with bright crimson red. Flesh lemon yellow, fine grained, sub-acid, rich, aromatic flavor. Season November to January.

Maiden Blush. One of the most beautiful; pale lemon with crimson cheek; flesh white, tender and crisp. October

Northern Spy. Large, bright, light red and yellow. Flesh juicy, rich, crisp, tender, aromatic, of good flavor. Tree strong grower. November to March,

Wolf River. Winter. Exceedingly large and handsome. Skin is a bright yellow, mottled and blushed with deep red. Remarkably good shipper.

Early Harvest. Ripens in August. Medium size; pale yellow; fine flavor. Tree a moderate grower and a good bearer.

McIntosh. Medium size, nearly covered with bright red; flesh yellowish, tender, juicy; sub-acid. October to February.

Spitzenburg. Winter. Medium size, round; dark red almost all over; firm, crisp, sub-acid. One of the very richest flavored of all Apples.

First-class, 4 to 5 feet, two year.....	.15	1.25	10.00
First-class, 3 to 4 feet, one year.....	.10	.90	8.00

Kieffer. The Kieffer has become one of the most profitable market Pears. It is an abundant and regular bearer, unsurpassed as a shipper, can market to a good advantage, much in demand by the canners and when properly canned is delicious; the tree is the strongest grower of all Pear trees. A beautiful yellow Pear with red cheek, large size. Season late to very late. Will produce ten bushels of Pears to the tree when ten years old. Starts successfully fruiting when three years old.

Bartlett. Ripens from August to middle of September. More generally popular than any other Pear. Good grower, white flesh, fine grained, luscious, large and buttery, has a rich melting flavor, very sweet.

Shade Trees

Silver Maple. Produces a quick shade, and is especially noted for street and yard planting. There are few trees superior to the Silver Maple. It is free from disease, and is the most rapid grower of all the Maples. It is of irregular round silvery foliage.

Norway Maple. A large handsome tree of spreading rounded form, with broad deep green foliage. Its strong growth render it one of the most desirable species for the street.

Silver Maple 10 feet, 40 cents each, \$3.00 for 10.

Silver Maple 8 to 9 feet, 30 cents each, \$2.00 for 10.

Silver Maple 7 to 8 feet, 10 cents each, 90 cents for 10.

Norway Maple 5 feet, 20 cents each, \$1.75 for 10.

Norway Maple 3 to 4 feet, 15 cents each, \$1.25 for 10, \$40. for 500.

Catalpa Speciosa. Originated in the West. Hardy and has become very popular through the country. The trunks grow straight and smooth and very rapidly. Is planted in large quantities for fence posts, railroad ties and telephone poles, also a good one to plant in parks and streets, A particular fast grower.

Price: 4 to 6 feet trees, 10 cents each, \$8.00 for 100.

Price: 3 to 4 feet trees, 8 cents each, \$7.00 for 100.

Dorothy Pekin Rose Bushes

One of the most beautiful of Roses.

Price: 25 cents each, \$2.00 for 10.

European Larch

Price: 3 ft. in height and circumference, 20 cts. each, \$2.00 for 10, \$15.00 for 100.

White Pine

Price: 12 to 14 inches, 10 cents each, 90 cents for 10, \$8.00 for 100.

Scotch Pine

Price: 12 to 18 inches, 10 cents each, 90 cents for 10, \$8.00 for 100.

Douglas Spruce

Price: 12 inches, 20 cents each, \$1.50 for 10, \$10.00 for 100.

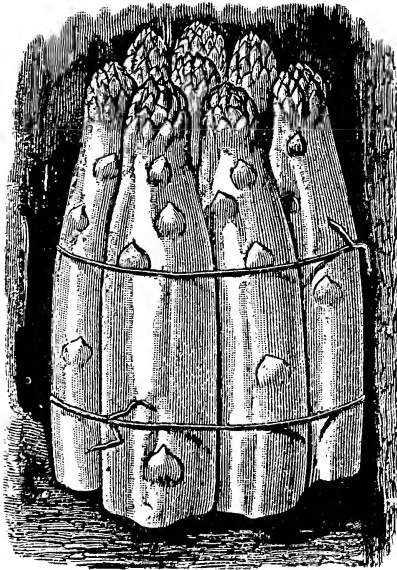

Cantaloupe Seed

EDEN GEM—Very doubtful if there is any variety of Cantaloupes on the markets that will anywhere compare with the Eden Gem in qualities that will make up a valuable market variety. The quality is very fine. The Cantaloupe is rough netted all over and makes a fine showing. We take particular pains in saving the seed and are offering you nothing but the best.

Price, 50c for 1-2 lb., 90c for 1 lb. By mail postpaid.

Asparagus Roots

Asparagus usually sells at a good price; is ready for market in April and May. The income derived from it is especially appreciated at that time of the year. It can be easily grown in all good garden soils, the sprouts are not usually cut until the second year after planting, except to mow down the canes in the fall. set the plants either in the fall or spring from 4 to 5 inches deep, covering with only 3 inches at first, cover the remainder as they grow. Broadcast from 5 to 10 bushels of salt to the acre early in the spring as a good fertilizer or about 300 lbs. Nitrate of Soda in March. Give it a good top dressing of stable manure in November. The roots will give good crops for 15 or 20 years.

Price, 1 year old roots: 30c for 50, 60c for 100, \$3.00 for 1,000.

Palmetto. Of Southern origin. Very large and prolific. All who have used it pronounce it very fine. Very popular.

Giant Argenteuil. This variety is largely grown in France, and has become adapted to our soil and climate. It is noted for its earliness. Remarkably healthy.

Barr's Mammoth. Early and very large, makes a rapid growth. A general favorite.

Our stock of Asparagus plants this season is very fine and the largest stock we ever grew. Can quote very attractive prices on orders for 3,000 or over. If Asparagus roots are to go by mail, add at the rate of 45c per 100.

Grape Vines

The Grape is the most beautiful of all fruits. Grape vines are very handsome and ornamental, they are fine to plant around the home for beautiful effects.

Concord. One of the most popular black varieties of Grapes in America. The bunch is large, shouldered and compact. The skin is tender, the flesh is juicy and sweet. Succeeds over a great extent of country.

Price, Strong 1 year old vines: 8 cents each, 70 cents for 10, \$6.00 for 100

Price, Strong 3 year old vines: 15 cents each, \$1.00 for 10, \$8.00 for 100

Niagara. Holds the same prominent position of the white Grapes as the Concord does of the black. Fruit is juicy, tender and melting sweet. Sells for first class price on the market. One-year old vines same price as one-year Concord.

Raspberry Plants

If to go by mail add at the rate of 40c per 100.

St. Regis (Everbearing). Judged by many to be the very best Raspberry grown anywhere at this date. It is the earliest of all Raspberries, begins to ripen while Strawberries are wanning; the berries are red of a bright crimson, of large size and will yield enormous crops of fruit from early spring until fall when severe frosts occur. Succeeds on all soils; can stand severe cold weather without damage, absolutely hardy.

Price: 50c for 25, \$2.00 for 100, \$6.00 for 500, \$12.00 for 1,000.

Plum Farmer (Black Raspberry). A great favorite for both home and market use throughout the country. The fruit is of good size, often measuring one-half of an inch in diameter. We unhesitatingly recommend this variety of Raspberries to any grower. The Plum Farmer is spoken of as being the best black Raspberry on earth.

Price: 40 cents for 25, \$1.00 for 100, \$4.50 for 500, \$9.00 for 1,000.

Haymaker (Purple Raspberry). Extra large and firm, never crumbles, stands up well in shipping. The best purple Raspberry.

Price, 40c for 25, \$1.00 for 100, \$5.00 for 500, \$9.00 for 1,000.

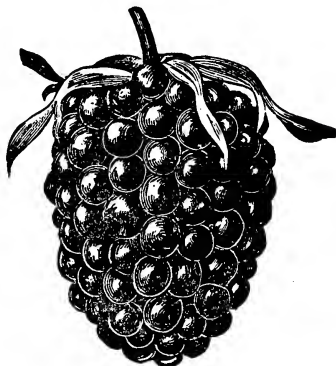

Dewberry Plants

Prices: 60c for 100, \$3.00 for 500, \$6.00 for 1,000.

We have a fine strain of Lucretia and Austin Dewberry plants, and can promptly fill orders.

Austin (Improved). An early Dewberry of excellent quality, produces large crops, ripens about a week earlier than Lucretia, for this reason it is valuable to grow in connection with that variety. Very hardy. Fruit very large, rich and melting.

Lucretia. The most largely grown for market Dewberries. Earlier than the earliest Blackberry, and as large as the largest of them. This is probably the best Dewberry for shipping long distances. The fruit is superb, large and handsome, jet black in color.

LUCRETIA

Currant Bushes

Prices: 15 cents each, \$1.00 for 10, \$2.00 for 50.

If to go by mail add 50c per 100 for postage.

Wilder (red). One of the strongest and most prolific growers; fruit large and firm, hangs on bushes a long time after being ripe, without damage.

Fay's Prolific (red). One of the leading varieties; is heavily planted everywhere, fruit large and very firm.

California Privet Hedge

California Privet is known by the Botanist as "Ligustrum Ovalifolium." It came from Japan and China, and can stand temperatures without damage; 10 or 15 degrees below zero seems to damage it but a very little. Did you ever realize what an admiring and luxuriant Privet hedge you could secure at a very small cost and a little work, and how much it would add to the value of your property? Note our very reasonable prices. Our stock for this spring is all two years old, strong and well branched with a wonderful root system. You need have no fear of losing such stock from the shock of transplanting. Just buy the stock, set it either 6 or 8 inches in the row where you desire to plant (placing them an inch or

so deeper than they stood in the Nursery) keep it free from weeds the first two years and manure with barn yard manure if soil is very poor, and by this time it will get its start and then nature will do the rest.

PRICES OF CALIFORNIA PRIVET

	10	100	500	1,000

3 to 4 feet, two year,40	3.00	11.00	22.00

Special prices on Car load lots

Evergreens

Norway Spruce. Most widely planted of all Evergreens. It is fast growing, graceful and handsome; at home any place you put it. Very handsome and ornamental.

Price: 24 to 30 inches, 25 cents each, \$2.00 for 10, \$9.00 for 50.

Price: 12 to 18 inches, 15 cents each, \$1.00 for 10, \$4.00 for 50, \$40.00 for 1,000.

Directions for Transplanting Trees

Prepare the ground as for a crop of corn; dig the holes large enough to admit the roots without crowding them. Avoid any unnecessary exposure of the roots to sun or wind. Just take a small number in the field at a time and keep the balance covered until wanted. The injured parts of the roots should be cut off smoothly with a sharp knife.

Shortening the branches is another very important matter to tree life. It consists of cutting back the ends of the branches, but to what extent it should be done depends upon the portion of the tree's roots that have been lost. If a tree has lost the greater portion of its roots, then a severe shortening will be necessary; but in all cases they should be shortened at the head to a certain extent.

The trees should have good clean cultivation, and as often as you do your corn crop. Hoed crops may be planted in the orchard for the first 4 years, after that the trees should have all of the soils substance.

A SQUARE DEAL

It is a great pleasure for us to try and please every customer, old or new. In the first place we do not discourage them by publishing long and extravagant descriptions of varieties, or by sending them any stock that we would not plant ourselves. Our stock will please you. Read what the ones who have tried it say.

We are herewith publishing a few of the many letters that we received from the ones who bought trees and plants of us last season, and it sure is a pleasure to us to know they were so highly pleased.

We do not substitute without your consent; when we are sold out of a variety of trees we frankly say so.

Dear Sirs:

Wellsburg, W. Va., May 8, 1914.

I received my plants on the 4th, they were in fine condition. I am satisfied with the plants and when in need of more will surely give you a chance at my order. I like the way you pack them.

Yours respectfully,

H. Heinzeroth.

Dear Sirs:

Dumcannon, Pa., June 11, 1914.

The order of California Privet Hedge you shipped me on May 28th came in fine condition, and were delivered on Saturday, the 30th, too late to plant. I gave them a good watering and put them in the cellar until Monday and they are as fresh as when you lifted them from the soil; they certainly were fine plants. The first order I gave you arrived in fine condition and are now growing nicely; I gave them plenty of water.

Yours truly,

W. J. Black.

Dear Sirs:

El Monte, Calif., Jan. 4, 1914.

I received the Strawberry plants in good condition. I thank you very much for the fine stock and for being so prompt about sending them. If we need any more will favor you with our order.

Yours very truly,

S. F. Araki.

Gentlemen:

Chester, Pa., May 8, 1914.

The Hedge arrived this morning in first class condition, and we wish to tell you that we are very much pleased with it. Thanking you for your promptness and assuring you of our entire satisfaction, I am

Very truly yours, Thos. S. Hall.

Gentlemen:

Augusta, Ga., Mar. 17, 1914.

The trees and plants arrived in good shape Saturday p. m. It is strong and healthy looking stock. Certainly hope I will be successful in raising them. They are the first Everbearing plants I ever saw in this part of the country. Thanking you for your promptness, I am

Yours respectfully,

J. D. Fooshe.

Gentlemen:

Terre Hill, Pa., April 10, 1914.

We received the berry plants yesterday, and people who have seen them say they never saw nicer plants.

Very respectfully,

Jacob Bicher.

Gentlemen:

Lewes, Del., April 11, 1914.

Enclosed please find check of \$31.68 for Nursery stock which arrived in good shape for which accept thanks and oblige.

Yours truly,

J. D. Thompson.

Dear Sirs:

Bethel, Pa., May 4, 1914.

Mr. John Baum's order for Nursery stock that was received through me was received O. K. and he is so well pleased he told me I should write you.

Yours truly, Howard H. Klime.

Dear Sirs:

West Port, Calif., July 1, 1914.

Strawberry plants received from you last March arrived in fine condition, and are now growing nicely.

Very truly yours,

Donald M. Pherson.

TESTIMONIALS

Dear Sirs:

Stowe, Vermont, May 2, 1914.

Just received plants to-night in good condition and were green and moist as if just dug. I have not set them out yet, expect to next week.

Yours for future orders, Mrs. F. J. Paul.

Dear Sirs:

Hummelstown, Pa., April 28, 1914

Our plants arrived in excellent condition. Thanks for the very fine stock and promptness in shipping. Enclosed you will find money order for more plants. Ship by U. S. Express as soon as possible.

Yours very truly,
Amos Myers.

Dear Sirs:

Forestville, Md., May 13, 1914.

Thank you very much for your prompt attention at my order. The rawberry plants, etc arrived Saturday morning in good condition. We have had a very harsh hot wind all the week but this morning prospect for rain.

Respectfully, J. E. Tolson.

Dear Sirs:

Walden, N. Y., May 18, 1914.

Enclosed find check for the amount of bill for trees and plants. Certainly were nice trees and am well pleased with them. Yours very truly.

Walkill Valley Farmers Association, John K. Brown, Vice-Pres.

Dear Sirs:

Skillman, N. J., April 28, 1914.

Enclosed find check of \$26.70. The Trees arrived this morning and are very satisfactory. I appreciate your kindness in sending me the very fine stock before receiving any payment on same.

Respectfully, E. James.

Dear Sirs:

Alloway, N. J., April 18, 1914.

Trees and plants arrived on Thursday in fine shape, much nicer than I expected. Many thanks far your promptness. Very truly yours,

G. W. Ayres, Sr.

Gentlemen:

Vidua, Md., April 7, 1914.

The Strawberry plants received in No. 1 condition, all satisfactory. Thanks for your prompt shipment.

Yours truly, R. H. Daumgartner.

Gentlemen:

Wernersville, Pa., April 6, 1914.

Enclosed find check for plants, they were in good shape and good count. I am pleased relatively you may count on orders for 1915.

Respectfully, A. F. Seip.

Dear Sirs:

Derry Church, Pa., April 16, 1914.

I received my Strawberry plants today in good condition. Am well pleased and thank you for your promptness and hoping to succeed with them, I am,

Yours very respectfully, Samuel B. Nye.

Gentlemen:

Greenwich, N. Y., May 8, 1914.

Strawberry plants came in good shape. People call them fine. Send me a catalog next year.

C. B. Carter.

Gentlemen:

Wilmington, Del., May 1, 1914.

Strawberry plants arrived in good condition. I am sending money order for same, am highly pleased with the stock, many thanks.

A. L. McClintock.
